Tel. (202) 293-2905 Tlx. 5101004573 (MDI)

Design: Peter Zuchi, 1984

Wood incrustation, the laying of solid wood pieces in a solid wood surface, has a tradition of craftsmanship going back many centuries. Evidence of this seldom found skill and quality work can be found in a limited number of furniture pieces from earlier periods. We are continuing this old tradition as a new element in the creation of modern furniture and combining it with improved production techniques.

## A R T INCRUSTA
